

CMO Hydraulic Riveter

Reliable. Powerful. Riveting.

The Ford-approved CMO hydraulic riveter is ideal for repairs needing selfpiercing rivets, flow-form rivets and blind rivets.

Doing a great job means having the right tools – like this powerful, portable CMO RV/EP02 Riveter. Quality engineered and manufactured in Italy, this unit comes with a number of attractive features including:

- Electro-hydraulic pump generating 8 tons of force • OEM-approved by Ford and compatible with many major manufacturers • Complete traceability USB Software for repair documentation and printouts • Automatically retracts once set force is reached • Powerful 18V DC lithium-ion battery with optional power network cable • C-arm grip handle • Operator adjustable compression force from 20 to 90 Kn • Optional C-arms for longer reach • Complete push-pull actuator • Dies for rivet removal • Ultra-quiet operation

With its quick-change dies, extractors and C-arms, the CMO Riveter is fast and versatile, and automatically releases to its neutral position once the rivet is set. Also easily extracts rivets.

Comes with case, software, battery with indicator lights and charging station. For a riveting performance every time.

The CMO Riveter kit includes manual, charging station and battery with indicator lights.

CMO RV/EP02 Riveter easily joins sheet metal or removes rivets already installed.

Optional C-arms provide longer reach.

Ford die kit also available as an option.
